

CALL FOR EXPRESSIONS OF INTEREST

# Universities and Social Inequalities in the Global South

Are you familiar with research around the topic of universities and inequalities, particularly in the global South? Do you know of analyses that show that tertiary education is fulfilling its potential to reduce inequalities, or is there more evidence that higher education institutions contribute to increasing inequalities? If so, we'd like to hear from you: we are launching a Call for Expressions of Interest in producing background papers which will help us to scope out a funding proposal for a full-scale project on the issue during 2019.

Deadline for submission of proposals **EXTENDED**  
~~10 March 2019, 23:59 CET~~ 17 March 2019, 23:59 CET
